

# Weekly report

An Nguyen

2017-06-20

## 1 Plan for this week

### 1.1 Research

- Fix up old net and fly Hexacopter with net.
- Help Praveen clean up his project so we can attach it to net.
- Sign up for FAA Exam

## 2 Done this week

### 2.1 Research

- Printed out a corner piece for the old net to hold everything together. I've flown the hexacopter with the net. So this net is usable as a back up/bigger net if necessary.
- Helped Praveen work with the GPS and current sensor parallel log.
- Tested the net Shriya made with Praveen's circuit. The net is working, except we need to reduce the separation distance a bit. Need to work on the circuit to be able to attach to the net and fly. We'll have a test flight on Thursday evening.

## 3 Plan for next week

### 3.1 Research

- Fly hexacopter with the net on Thursday evening
- At least one more test flight next week
- Help Praveen analyze the log
- Sign up for FAA Exam

## 4 What Dr. Becker need to do
