

Weekly report

An Nguyen

2017-06-20

1 Plan for this week

1.1 Research

- Fix old net to fly. The old net has a small corner broken off but I can fix it again to fly while waiting for Shriya's net.
- Study for FAA exam
- Work with Praveen to clean up wiring

2 Done this week

2.1 Research

- Helped Praveen with GPS problem. There was a problem of recording GPS waypoints as the same time as recording analog reading for the net. I spent a bit of time talking to Praveen and showing him my old analog voltage code. I also showed him my method of making the scripts start up at boot.
- Studied a little bit for FAA exam.
- Working on the corner piece to fix the net
- Helped Shriya print the net pieces

3 Plan for next week

3.1 Research

- Fix up old net and fly Hexacopter with net.
- Help Praveen clean up his project so we can attach it to net.
- Sign up for FAA Exam

4 What Dr. Becker need to do

I'll send you 3 papers that I would like to present at the end of tomorrow or Thursday. If you have a particular paper for me in mind, please send it to me.
